

Model GFB

Baffle Grease Filters

GENERAL DESCRIPTION

These filters are designed for use in commercial kitchens and ventilation from food preparation areas where their primary function is to prevent flame from travelling from the cooking area up into the extract duct.

Construction

These filters are made from rolled channel frames, with safety edges. Each blade overlaps the opposite one to provide a tortuous path for the grease laden air. The grease drains down the blades and through the drain holes provided into a collection tray provided in the kitchen canopy.

These Filters are available in the finishes below

Stainless Steel

Aluminium

Teflon Coated Steel

Brushed Stainless Steel

Galvanised Steel

GFB Baffle Grease Filters

STANDARD SIZES

Jasun Filtration always specify filters as Height (H) x Width (W)x Thickness (T) This is particularly important with baffle filters because the handles will always go on the H side, the blades will always run along the H side, and the drain holes will always be in the W side
